### SAFETY & PROTECTION

**Quick Release Belt Gives Extra Safety**  
Professional quick release buckle and belt system. Six-point mounting provides maximum impact protection, and the unique release buckle is designed for a quick, safe exit with only a quarter turn. It's a complete system, with 3" seat belts, shoulder harness, and double substrap. Fits all Porsches. Available in black, blue or red.

Quick Release Belt Ref.# 9371 \$240.95 EA

**Weltmeister® Kill Switch Kit**  
Designed for the 65-98 911\*. The Weltmeister® kill switch kit incorporates our specially designed mounting bracket, so no holes need to be drilled in the car. The custom cable can be routed through the windshield washer jet hole, a new hole drilled, or pinched between the hood and the body for a totally reversible installation. Includes various connectors and hardware for professional installation. Our switch is the alternator protector style. 911\* 1965-98 913298 \$239.98 EA

**Safety Belt Eye Bolt**  
Strong eye bolt for securely attaching racing belts, complete with nut and backing washer. Eye Bolt 910156 \$8.95 EA

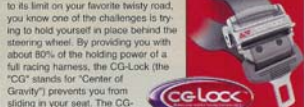

**Drive Safer With This Nifty Belt Lock**  
For you and your children, this safety belt clip locks the retracter type lap belt securely in one position. It's handy for holding infant carriers in place and great for holding you firmly while you're autocrossing. Safety Belt Lock 910215 \$19.95 EA

**Relive Your Track Sessions**  
For critiquing driving techniques (or sheer entertainment), nothing is better than an in-car view of the action. Now, with our roll bar camera mount and your video camera, you can have it all. 3-axis adjustment lets you capture any view — study strategies, document infractions, refine your technique, even tape yourself as you drive. Special vibration-reducing urethane bushings assure a clear picture. No drilling required. Fits 1 1/2" to 2" roll bars. SCCA and PCA legal. Security strap included. Camera Mount 883159 \$134.95 EA

**Anti-Submarine Strap**  
Designed to prevent you from "submarining" under your lap seat belt, it also keeps the seat belt down around your hips. When you do not want to drill holes in the car, we recommend the double strap. It attaches to the same bolts that hold the front seat belt.

**CG-LOCK Seat Belt Lock**  
If you've ever tried to autocross your Porsche® or even attempted to drive it to its limit on your favorite twisty road, you know one of the challenges is trying to hold yourself in place behind the steering wheel. By providing you with about 80% of the holding power of a full racing harness, the CG-Lock (the "CG" stands for "Center of Gravity") prevents you from sliding in your seat. The CG-Lock lets you keep your feet and hands light on the pedals and wheel resulting in better control, faster reactions, and less fatigue. Becoming "one with the vehicle" helps you feel the road and the car's "balance", enhancing your driving abilities. Just clip the tongue of your seat belt into the CG-LOCK to tighten and lock the lapbelt. CG-Lock 883430 \$41.95 EA

**Colorful Racing Protection**  
Order Colors: Blue, Black, Red. Belts come complete with hardware.

**3" Competition Lap Belts**  
Our race-legal belts feature center adjustment for greater convenience when drivers of various heights drive the same car. Note: inboard mounting bolt may need shortening on early 911's to prevent hitting the shift linkage.

**Shoulder Harness**  
We offer both the 2" wide harness and the 3" H-style required by race associations. Connects to latch-style competition belts. Can be looped over roll bar or connected with hardware.

**Single Strap** Ref.# 9556\*\* \$19.95 EA
