CG-LOCK

($42) is designed for vehicles that are taken on track or just driven hard. The CG-Lock clips onto the tongue of a vehicle's factory-installed seat belt. Once installed, you pull up on the shoulder harness of your seat belt and the lap belt portion gets "racing harness tight." Mather Automotive Innovations, (302) 234-8110, www.cg-lock.com.

GARAGE TEST RATING	
Durability	8
Design	9
Performance	8
Rated Against Similiar Products	10

Floyd Mitchell, Cheektowaga, NY:
"I found I had less side-to-side movement when cornering in my Mustang. I remained firmly planted in the seat, resulting in more control during high-speed maneuvering."

Joe Gonzalez, Palm Bay, FL:
"The CG-Lock is well made and easy to install. It kept me firmly in place during an autocross and I felt more secure."
